

# C.Q.R.iT<sup>®</sup> *Series II*

*pronounced 'Secure It'*

*"Finally we control when and who can have access to our sites. It's all about knowing what's going on, after all I am responsible for security. C.Q.R.iT<sup>®</sup> gives me the tool to do this effectively"*

Control your keys  
Secure your assets  
Increase your security

# C.Q.R.iT<sup>®</sup> Series II

more accountability > greater security > the same great price!

## Problem?

Wasting time looking for keys?  
Spending money re-keying locks?  
Don't have accountability of your assets  
Unable to track users?  
Too many resources tied up managing keys?  
Still using a paper system?

## Problem solved!

Know who accessed company assets e.g. vehicles.  
Identify those responsible for keys.  
Reduce theft and inventory losses.  
Reduce the cost of replacing keys or re-keying locks.  
Stop unauthorized access to restricted areas.  
Know when the keys are accessed and returned.

Control and management of your keys should be an integral part of your security management approach. If keys and assets are not being appropriately issued, managed and accounted for, the opportunity for compromise is increased. Loss of inventory, misuse of assets and inappropriate access to property can be significantly reduced using C.Q.R.iT<sup>®</sup>.

CIC Technology continues to advance the capabilities of the C.Q.R.iT<sup>®</sup> key management technology and have now launched C.Q.R.iT<sup>®</sup> Series II further enhancing the popular C.Q.R.iT<sup>®</sup> range.

**W** *The C.Q.R.iT<sup>®</sup> Key System takes the 'man' out of key management! A self-sufficient key management system that does all the legwork. No more tedious or indecipherable written records. No more hours wasted piecing together key movements. 100% accountability, 100% of the time, and all at a moment's notice with the ability to generate a range of detailed reports with the click of a mouse! Highly recommended to solve all your key management issues, the C.Q.R.iT<sup>®</sup> system is the avenue to take.* **W**

## How Does It Work?

### SOFTWARE FOR CONTROL:

The included KeySecure<sup>®</sup> software gives an administrator total control over key usage by allocating or restricting access to keys on a user by user or group by group basis. A multitude of reports can be generated making the user accountable for the key and the valuable or sensitive assets associated with the key.

### THE CABINET FOR KEY STORAGE:

Your keys are stored inside the high security cabinet that can only be opened if you have the correct authority such as PIN/Card access.

### SECURING THE KEYS:

Key bunches are secured using tamper proof key rings that prevent inappropriate removal. This key ring secures your keys to a metal carrier key that fits to its individual locks in the key cabinet.

### THE AUTHORIZED USER:

Once authorized, the user can open the cabinet door and turn the carrier key to remove or return their allocated keys and key bunches. C.Q.R.iT<sup>®</sup> is simple to access while maintaining security of your valuable assets.

Regain control of your keys, increase security in your organization and reduce theft and loss of property.

# More Features, Greater Capabilities

Cabinets with capacity to hold 12, 25, 50 and 100 Key bunches.

All models can be partially populated - order the cabinet populated with key positions for only as many key bunches as you need.

Expansion cabinets available to expand your key capacity.

Cabinets operate with or without the door - ideal for speeding up access when installed inside a secured area.

Override Key Release option (in addition to manual release of keys) available to administrators for accessing keys in an emergency or during an extended power outage.

Emergency Lockdown can be triggered at cabinet or from software to suspend all access and prevent further keys from being taken.

Duress Alarm - users can trigger a silent alarm to notify security immediately if a user is being forced to access the cabinet under duress.

Configurable Authentication Methods. Select the method for accessing the cabinet that best suits your organization - UserID & PIN Card & PIN or Card Only. Also supports Biometric Readers.

Configurable Audible Alarms. Cabinet alarm siren includes Volume Control and can be individually Enabled/Disabled for specific types of alarms.

Configurable Relays for immediate notification of alarms/events to third party Security Management Systems.

Firmware Update via USB drive allows you to stay up-to-date with latest enhancements and features.

On-board Diagnostic function provided to assist technicians and reduce downtime during scheduled maintenance.

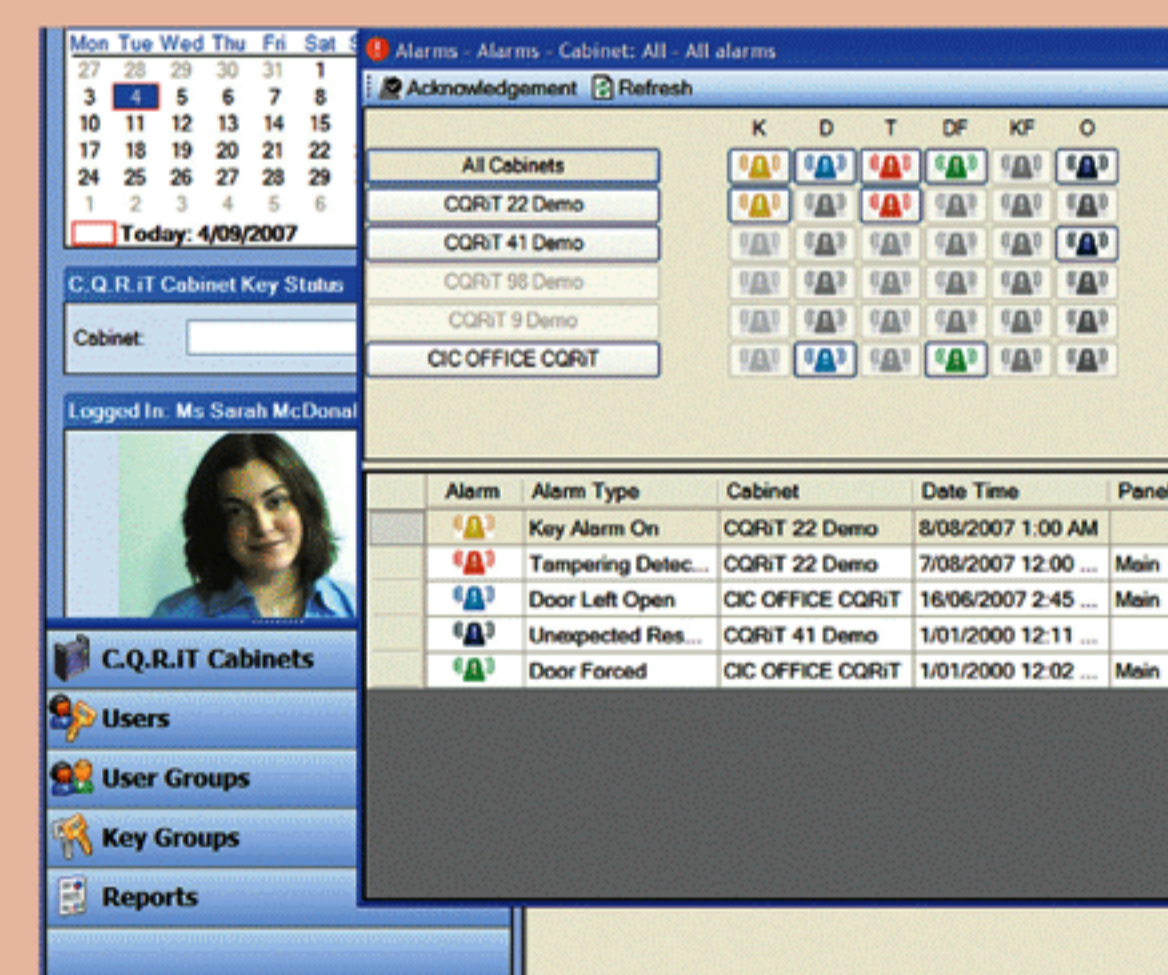

Integrated C.Q.R.iT® Camera option allows you to monitor and record person withdrawing and returning keys.

**C.Q.R.iT® provided our corporation with an overnight solution to managing our keys and made people accountable for key usage and restricted access to equipment. No more manual systems that did not reflect the real situation.**

## KeySecure® The software behind the Cabinet

- Allocate** You decide who has access to your assets and when
- Audit** Know what's going on all the time, every day
- Report** View a range of reports including, current status, daily logs, track activities of keys or users
- Monitor** Re-instate your security and control
- Alarm** Instant response to any potential security breach to central central computer, cell phone, or PDA
- Time** Set various times for checkout and return of individual keys

## Service and Training

Customer Service Policy is our commitment to you. A product is only as good as the service that comes with the product you have purchased. Our large client base and the repeat sales are a testament to the on-going efforts our technical staff place on making sure you get the best value from your cabinets. That's why we offer on-line training and support to you 24/7. We are committed to professional support, maintaining confidentiality and being responsive.

## Cobra Tamper Proof Key Rings™

Cobra Tamper Proof Key Rings™ are of the highest quality and the most secure key ring on the market today. Available as solid or flexible cable in stainless steel each key ring has it's own unique serial number that is laser engraved on each key ring. They cannot be opened without detection and substitution is impossible. Cobra Key rings presents the "Slide-n-Crimp™" feature which simplifies the closing of the key ring and reduces tooling cost.

Diameter	Capacity
1" (2.5cm)	1-3 Keys
1.5" (3.8cm)	1-4 Keys
2" (5cm)	1-5 Keys
3" (7.6cm)	1-7 Keys
4" (10.1cm)	1-9 Keys

\*Patent Pending

## KeySecure® Software Specs

Software	Windows-based application built on the Microsoft®.Net Framework	
Database	Microsoft® SQL Server Technology (MS SQL Server Express Edition)
